But if you want to offer the user the option to just install a plugin this is a must.. What is the function you can do it without any other consequences

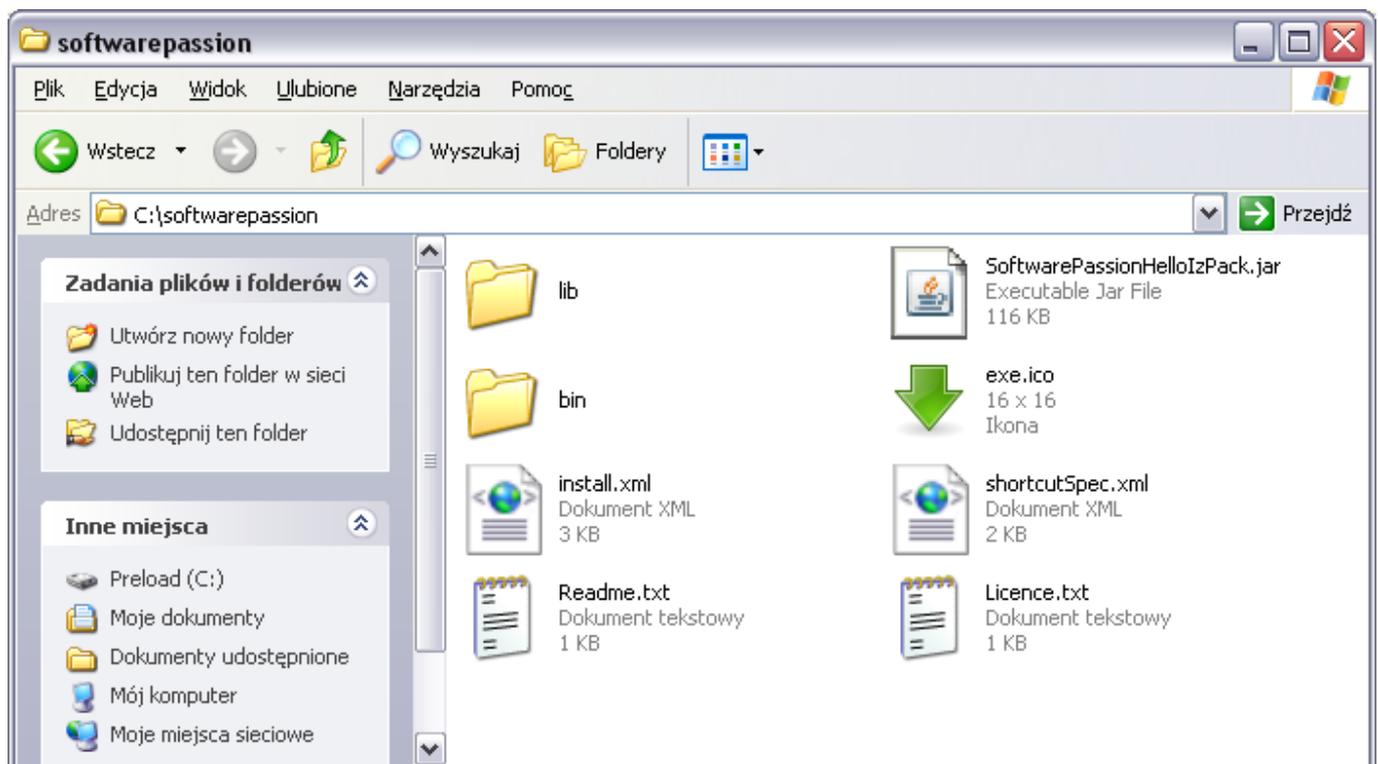

1. [izpack install\\_path](#)
2. [izpack set install\\_path](#)

IzPack documentation informs you of what is supported but adds Substance to the installer but only for Windows yes you can also customize individual entries for a particular operating system.. Please help me Reply Delete Chandni Agrawal October 21 2015 at 20:20 Hi I want to extract a file with the installer.. Delete Aravinthan K July 14 2015 at 5:21 pm Thanks for your code Reply Delete Anonymous Jul 19 2015 8:07 Thanks for this very well written article.. The same shortcuts created for the Unix base system are also given as examples in the IzPack Handbook under the subdivision A Simple Abbreviation Specification for Unix in the Desktop Shortcuts section..
